

Name _____

Date _____

Class _____

Roll and Answer

Roll the dice 5 times, answering the question that matches the number you roll. Take turns with your partner rolling the dice, but you both work out the problem. If you roll a number that has already been taken, roll until you get a number that hasn't. Check your answers with each other.

Make sure to simplify your answers!

Roll	Problem	Answer
2	$\frac{3}{4} - \frac{2}{4} =$	
3	$\frac{1}{6} + \frac{3}{6} =$	
4	$\frac{4}{5} + \frac{4}{5} =$	
5	$\frac{5}{9} + \frac{1}{9} =$	
6	$\frac{1}{3} + \frac{7}{3} =$	
7	$1\frac{3}{8} + 1\frac{1}{8} =$	
8	$1\frac{3}{4} - 1\frac{1}{4} =$	
9	$\frac{7}{8} - \frac{1}{8} =$	
10	$\frac{11}{12} - \frac{9}{12} =$	
11	$5\frac{5}{6} - \frac{1}{6} =$	
12	$14\frac{4}{9} - 12\frac{1}{9} =$

Roll and Answer

Roll the dice 10 times, answering the question that matches the number you roll. Take turns with your partner rolling the dice, but you both work out the problem. Check your answers with each other.

Make sure to simplify your answers!

Roll	Problem	Answer
2	$\frac{3}{4} - \frac{2}{4} =$	$\frac{1}{4}$
3	$\frac{1}{6} + \frac{3}{6} =$	$\frac{2}{3}$
4	$\frac{4}{5} + \frac{4}{5} =$	$1\frac{3}{5}$
5	$\frac{5}{9} + \frac{1}{9} =$	$\frac{2}{3}$
6	$\frac{1}{3} + \frac{7}{3} =$	$2\frac{2}{3}$
7	$1\frac{3}{8} + 1\frac{1}{8} =$	$2\frac{1}{2}$
8	$1\frac{3}{4} - 1\frac{1}{4} =$	$\frac{1}{2}$
9	$\frac{7}{8} - \frac{1}{8} =$	$\frac{3}{4}$
10	$\frac{11}{12} - \frac{9}{12} =$	$\frac{1}{6}$
11	$5\frac{5}{6} - \frac{1}{6} =$	$5\frac{2}{3}$
12	$14\frac{4}{9} - 12\frac{1}{9} =$	$2\frac{1}{3}$
