

Match-the-Fraction Freebie

- Provides practice matching improper fractions with mixed numbers
- Easy to cut out; Requires little colored ink
- Great for centers or partner/small group work

Created by Joy in Sixth

Fraction Cards Freebie

This is an easy-to-use product to help students practice matching improper fractions and mixed numbers.

To make things easier, the mixed numbers are coded with mittens and the improper fractions are coded with hats. This helps students organize the cards for sorting and provided a scaffold for students who are new to the concept.

Used in a center, students can match the improper fraction cards with the corresponding mixed number cards.

NOTE: If you want to make the center self-checking, just add a matching letter or number code to the back of the cards so that students can check their work.

In a small group, students can use the cards for a game like "Concentration." (You may want to use fewer cards than the 48 provided.)

These cards could also be used in a small group for a game of Go Fish!

$$4\frac{2}{7}$$

$$3\frac{3}{5}$$
