

SS3.3

Perimeter Shapes

Using cm grid paper, ask students to create three different shapes for a given perimeter. They must follow three rules:

- 1) Stay on the lines when you draw.
- 2) You must be able to cut your shape out and have it all in one piece.
- 3) Each shape must have a perimeter of the given length. E.g., 30 cm.

Record the perimeter on each shape. (3SS5.3)
