

N3.1

Hockey Card Activity

Give pairs of students six hockey cards and adding machine tape (to create number lines). The set of hockey cards is their team. They are assigned a statistic from the back of the hockey card (games played, weight, career goals, etc.). Students write the numbers on 'Post It' notes and place the numbers on their number line from least to greatest, using bench marks to help them. Partners post finished number lines on the wall and present it to the rest of the students explaining their thinking for their sequence.

A hockey card for Wayne Gretzky, number 243. The card is yellow and red. It features a photo of Gretzky in an Oilers jersey. The card includes his stats for the 1978-79 season and his career totals for the NHL and WHA. It also mentions that he won the Stanley Cup with the Oilers in 1984.
