

N2.9

Take It Away Card Game

2 – 4 players

Getting Ready

- Remove the 10's from the pack.
- The dealer deals 4 cards to each player.
- Players look at their cards.

Play the Game

- Each player makes two 2 digit numbers from their cards.
- Players then subtract their smallest number from their largest number and tell the answer. (Do this mentally or use pencil and paper if necessary.)
- The player with highest number for the answer keeps their cards. e.g. With 3, 6, 7 and 9 a player could make $97 - 36 = 61$. If this is the highest answer, this player keeps these cards.
- Other players return their cards to the pack. 4 cards are dealt to each player for the new round.
- The game ends when there are no longer enough cards to deal each player 4 cards. Players total the values of the cards they have won. The winner is the player with the highest total.
