

SP6.1

Students can visit different databases such as Stats Canada, Guinness Book of Records, and the NHL Database. Provide opportunities for them to explore the sites and to discover the layout, to see how things are organized and to get used to navigating the database. Ask students to choose one database of interest, to collect some data that they are interested in and to share it with the class. (6SP2)

Ask students to create a graph that shows the growth of the Canadian population over a period of 20 years. Discuss the various databases that could be accessed to find the information. (6SP2.4)
