

Ratio Scavenger Hunt

Thanks for downloading this free item!

You can check out the [Unit Rate Combo Pack](#), or the [Ratio and Rates Quiz pack](#), along with many other fun, affordable items at my Teachers Pay Teachers shop:

[Mathematic Fanatic](#)

Thanks, and enjoy!

Ratio Scavenger Hunt

Search around the room to find the following items. Count them, and compare the number of items using a ratio.

You can write each ratio three different ways.

For example, if you were comparing the 2 clocks to the 1 light switch, you could write 2:1, 2 to 1, or $\frac{2}{1}$.

Find and record the ratio of...

Boy students to girl students

Total students to teachers

Teachers to boy students

Teachers to girl students

Total students to total desks

Desks to chairs

Days in this month to days in last month

Days in the week to days in this month

Clocks to doors

Windows to flags

Tissue boxes to computers

Calendars to flags

Finished early?

Record any other ratios that you notice, using items or information in this room. Be sure to label your ratios so you can tell us what you counted and compared.
